Development Focuses</p> <p>The department aims not only to develop the science and technology needed to effectively utilize agricultural and aquatic resources but also to train specialists and scientists in the field of food science. Our 21 faculty members teach and conduct a wide range of research and extension projects. In the foreseeable future the department will be able to provide an exceptional environment for study and research, especially in the fields of food science and biotechnology.</p> <p>2. Research Characteristics</p> <p>Major research areas are focused on food chemistry, food processing, biotechnology, food microbiology, nutrition and food engineering. Faculty members conduct their research in well-equipped research laboratories where students are also trained in experimental techniques. Specified research topics include: 1) food biotechnology; 2) chitin and chitosan; 3) health foods and functional products; 4) fishery toxicology; 5) food enzymology; 6) utilization of underutilized fish; 7) nano technology application on food; 8) fish physiology; 9) fish nutrition; 10) new product development.</p>	1. College of Ocean Science and Resource	<p>1.Aims and Feature: In order to provide a superb strategy for effective management and utilization of sustainable marine resources, the protection of marine environment as well as conducting fundamental research focused on marine ecosystems are required. The IMECE graduate program is specifically designed to educate students to be as qualified marine scientists with sufficient professional knowledge in marine environmen and ecology.</p> <p>2.Education: Graduate students can select marine environment and /or marine ecology as their major area for theses research. Marine research in general is strongly tied with other disciplines and there exist complex interactions among them. It often demands a collaborative team consisting of scientists with various expertise to closely work together. IMEE has set up a long-term research project focusing on research in marine environmental chemistry and marine ecology through collaborations of faculty and graduate students. It is important that IMEE graduate students have the ability to conduct collaborative research and learn how to apply their professional knowledge and techniques to field investigations.</p>	<p>1. 	<p>3.Research: Marine ecosystem is significantly affected by global environmental changes and activities associated to human development. The scientific research objectives of IMEE are to evaluate and predict potential impacts of global environmental changes and regional anthropogenic activities on marine environments, including changes in forcing functions (currents, light regime and water temperature), in chemical compositions (nutrients, organic matter, trace metals and environmental hormones), and in the transportation of energy and organic matter in marine ecosystem.</p> <p>4.Facilities: IMEE is well equipped with various modern equipments to conduct marine environmental surveys and monitoring. These include all types of microscopes and a Flow Cam for plankton research, a Flow Cytometry for microbial biology research, a self-designed flow injection analyzer for nutrient analysis, a dissolved inorganic carbon analyzer, a total alkalinity titrator, and an underway pCO₂ system for carbonate chemistry study, etc.</p>

Admission Criteria (Doctoral Degree Program of Ocean Resource and Environmental Changes)

College	Research fields and features	Additional application documents	Bachelor	Master	Ph. D.
College of Ocean Science and Resource	Global environmental change (GEC) is the cascading effects of global warming, ocean acidification, and anthropogenic influences that have a profound impact on the life and survival of human being. In the ocean, GEC has vigorously disrupted the operation of the marine ecosystem, including the significant declines of the absorption capacity of carbon dioxide and the abundance of marine resource. Hence, the impacts of GEC on the marine ecosystem is crucial and changeling for the sustainable development of humanity. In this regard, we aim to build up the scientific knowledge base, develop the novel technology, and promote the innovative company for the mitigation and adaptation of the impacts of GEC on the marine ecosystem. In our doctoral degree program in ocean resource and environmental changes, students are expected to develop the professional skills to perform interdisciplinary research with particular emphasis on marine environment, marine resource, and marine affair. This Ph.D. program was approved by the Ministry of Education in 2014 and launched at NTOU in September 2015.	1. College of Humanities and Social Science	<p>1. The Institute offers a regular graduate program leading to the Master of Business Administration (MBA) degree in applied economics. This is a 40-credit program with 25 elective and 15 required credits (cr.), consisting of seminars for 3 cr.; Thesis for 6 cr.; Microeconomics for 3 cr.; and Econometrics for 3 cr. For overseas students, the Ministry of Education requires a pre-entrance Chinese proficiency examination.</p> <p>2. The required language of the thesis is Chinese. The program is typically completed in two years. Applicant for the special on-job training program on marine and aquaculture affair management are required to have at least two years of experience in related activities.</p> <p>3. The degree program is industry-oriented aiming at producing graduates with professional expertise in management of industrial and fishery enterprises. The program is also research oriented with an emphasis in training graduate students to conduct independent economic research addressing industrial and fishery issues. It provides excellent preparation for students seeking advanced studies in other Ph. D. programs or professional careers in the private and public sectors. In addition to coursework, the Institute trains students through research assignments, seminars, field trips, and discussion opportunities.</p>	<p>1. Recommendation letters.</p> <p>2. Phụ lục: Giấy thông báo chi phí xét nghiệm và điều trị HIV

(Đề nghị bệnh viện khi cấp Báo cáo khám sức khỏe thì cấp kèm Giấy thông báo này)

1. Chính phủ Đài Loan đã sửa đổi pháp lệnh, hủy bỏ quy định hạn chế nhập cảnh, tạm trú và cư trú đối với người nước ngoài bị Hội chứng suy giảm miễn dịch mắc phải (HIV), và cũng hủy bỏ hạng mục xét nghiệm này trong quy định khám sức khỏe.
2. Do Chính phủ Đài Loan không trợ cấp chi phí điều trị HIV tại Đài Loan cho người nước ngoài, mà chi phí điều trị mỗi năm khoảng 300 ngàn Đài tệ (khoảng 10 ngàn Đô la Mỹ), nên kiến nghị người nước ngoài, trước khi đến Đài Loan hãy tiến hành xét nghiệm HIV ở nước mình để nắm bắt tình hình sức khỏe của bản thân; nếu bị nhiễm HIV, kiến nghị hãy ở lại nước mình để điều trị. Đối với người dự định đến Đài Loan làm việc, kiến nghị hãy mua Bảo hiểm Sức khỏe trước, nhằm tránh gánh nặng tài chính cho bản thân.
3. Người nước ngoài sau khi đến Đài Loan có thể tự đến bệnh viện xét nghiệm HIV để nắm bắt tình hình nhiễm bệnh của mình, số điện thoại tư vấn bệnh truyền nhiễm tại địa bàn Đài Loan là: 0800-001922.

Appendix: Notice for HIV Screening and Treatment Costs

(Health examination hospitals shall issue this notice and health certificate to the examinee)
